

MOHAMMED JASIR

FLUTTER DEVELOPER

jasirm203@gmail.com | +91 9746554285 | [LinkedIn](#) | [GitHub](#)

PROFILE

Highly creative Flutter Developer who can work well within a team or on individual projects. Passionate about coding, solving technical errors and in taking the full ownership of app development. Able to design and build fully sophisticated and highly scalable apps using Flutter. Excellent problem-solving skills, and attention to detail.

PROJECTS

ChatBot – Chat Application

[GitHub](#)

ChatBot is a mobile application developed using Flutter and Firebase. This application has got a beautiful user interface, it allows users to chat, send friend requests and video call. An interactive chatbot that allows the users to know whether your friend is online in the chat is implemented for better user experience.

- One to one video calling using Agora video call SDK integration
- Bloc used for state management
- Integrated Firebase services into the application for real-time data syncing and authentication
- Utilized RESTful APIs to generate tokens for video chat

ExpenZ Tracker

[GitHub](#) | [Play Store](#)

ExpenZ Tracker is a money management application developed using Flutter. Simple user interface with features like planner and statistics to manage financial transactions. The user-friendly UI allows users to easily navigate and utilize the features. The statistics feature allows users to evaluate and understand their expenses in a better way.

- Implemented custom user interface components and responsive design
- Debugged and fixed issues to improve the performance and stability of application
- Provider used for state management.

Netflix Clone App

[GitHub](#)

A user interface clone of the Netflix application was developed using Flutter. TMDB API has been connected to the app for users to search their favourite movies, read movie descriptions and even watch trailers for upcoming movies. Bloc used for state management.
